Run from Reads Corner Grain Elevators on Trail until right after the intersection with Autumn Street – once you hit the section in between Autumn and King Street, you're there! **FINISH LINE**

Where the trail crosses autumn street and then King street, in between those two is a little green space with spaces for a few cars. Both of those streets are quiet, and so I think that's a good final place. Teams can wait there until their team has finished and then exit the area.
